DNSMON Beta

Anand Buddhdev
DNS Services Manager, RIPE NCC

New Features

- New architecture – faster graph generation

- Login username linked to default graph

- Natural language input box

- Graph any combination of probes, servers and domains

- Mouseover helps identify data points on dense graphs

- Easy drill-down by selecting areas of graph to zoom

- Anycast-related plots of root name servers

Planned Features

- EDNS0 support
  - NSID support for anycast node identification
  - DNSSEC checks
  - Large packet checks
- TCP probes
- What else?
