OARC 2005 Workshop (Redwood City)

Monday 25 July 2005

DNS measurements and related issues: What's All This "Internet Governance" Talk and Why do I Care? - Main ISC boardroom (12:00 - 12:15)

  -**Conveners: Suzanne Woolf**

DNS measurements and related issues: DNS cloud project - Main ISC boardroom (12:15 - 12:30)

  -**Conveners: Rodney Joffe**

DNS measurements and related issues: DLV overview - Main ISC boardroom (12:30 - 12:45)

  -**Conveners: Paul Vixie**

DNS measurements and related issues: DNS Statistics Collector: overview and demonstration and Searching for DNS Cache Poisoners - Main ISC boardroom (12:45 - 13:10)

  -**Conveners: Duane Wessels**

DNS measurements and related issues: RFC1918 updates on servers near M and F roots - Main ISC boardroom (14:00 - 14:30)

  -**Conveners: Andre Broido**

DNS measurements and related issues: Effect of anycast on K-root: some early results - Main ISC boardroom (14:30 - 15:00)

  -**Conveners: Lorenzo Colitti**

DNS measurements and related issues: On the use of anycast in DNS - Main ISC boardroom (15:00 - 15:15)

  -**Conveners: Andreas Terzis**

DNS measurements and related issues: Experimental Data on Anycast: Characterizing DNS query distribution in an anycast cloud - Main ISC boardroom (15:15 - 15:30)

  -**Conveners: Suzanne Woolf**

DNS measurements and related issues: General discussion: DNS data collection and availability - Main ISC boardroom (15:30 - 16:00)
