Workshop topics - what do we want to hear about?

- This how to do it (e.g. DNS cookies in Anycast, RPZ, DNSSEC ...)
- Tools and tooling developed and deployed
- Cautionary tales
- Data-driven research and analysis
- What's coming next?
 - new protocol/protocol extensions
 - next generation name space management
 - global/regional policies and legislation
- ...

Workshop speakers

- Do you have something to share?
- Submit an abstract. You don't need slides right away, just a good idea and clear explanation of what you'll be talking about and the takeaways from it for the potential audience
- If you think something is interesting - chances are that the Programme Committee will think so too
